

Northwest Nassau Natural Gas Integrity Project

Overview

National National Grid is making a significant investment to modernize our natural gas system in Northwest Nassau County. This project, known as the Northwest Nassau Natural Gas Integrity Project, will help upgrade and improve the safety of Long Island's gas system.

Since the project started in June 2017 National Grid has installed two regulator stations in Roslyn Heights and Old Westbury, and nearly 4 miles of new gas main on Old Westbury Road, Powerhouse Road, Locust Lane and Roslyn Road.

What to Expect

Construction on the latest phase of the Northwest Nassau Natural Gas Integrity Project began in May 2021 just north of East Williston Avenue. We anticipate completing gas main installation at the intersection of Roslyn Road and Old Country Road in late Fall of 2021 and then continuing our work down into Garden City. This work will consist of trench excavation within the roadways followed by installation of the new gas main, temporary paving and, finally, restoration of the roadway.

During ongoing construction, there will be changes in traffic patterns on Roslyn Road. Flaggers will be present to direct traffic as needed. Our project outreach team will provide timelines to local residents and stakeholders with as much notice as possible.

Our Commitment

We will construct the new infrastructure safely and reliably while sharing information widely so that we can continue to serve our community well into the future. Throughout the project, we will make every possible effort to update our commercial and residential customers and other residents about upcoming actions, impacts and road closures, and maintain an open and proactive dialogue about the project with our neighbors and partners in Nassau County.

To stay up-to-date on this phase of the project from beginning to completion, please remember to visit our website at www.NorthwestNassauIntegrity.com and sign up for email updates. You can also email our project team at NWNassau@NationalGridGasProjectsNY.com or contact us through our outreach team phone number 516-882-4864.

**Due to the complexities of outdoor construction, the schedule is subject to change.*

(continued on back)

Northwest Nassau Natural Gas Integrity Project

We're committed to the safe, reliable and efficient operation of our natural gas networks in the communities we serve. Our number one priority is the safety of the public, our customers and our employees.

Our Investment In Gas Infrastructure Will Focus On

- Replacing older gas mains and services to enhance the safety and integrity of our gas networks.
- Installing and upgrading gas mains and other facilities.

Smell Gas. Act Fast.

For gas emergency service in Nassau, Suffolk and the Rockaways, please call 911 or 1-800-490-0045.

Keeping You and Our Employees Healthy

We are following strict procedures to help keep you and our employees safe from COVID-19, and we appreciate your cooperation in helping minimize the spread of the disease. For more information about National Grid's response to COVID-19, please visit: ngrid.com/covid19

About National Grid

National Grid is the largest distributor of natural gas in the northeast US, serving customers in Massachusetts and New York. In downstate New York, National Grid provides service to more than 1.9 million customers in New York City (Brooklyn, Staten Island and parts of Queens) and on Long Island.
